- bootstrap, tailwind
- docker
- git
- Laravel
- Swagger

LANGUAGES

native Portuguese, fluent English

PROFILE

I'm a web developer with experience starting in 2021, and I'm currently working as a developer for a SAAS CRM application for real estate agencies. My strengths lie in PHP and I prefer using Laravel framework when possible. I'm also well-versed in mySQL, JS, HTML, CSS, and bootstrap.

I prioritize a streamlined workflow and always utilize GIT for version control, creating branches to ensure quality assurance. Collaboration is key to me, and I enjoy working with others to create successful projects.

I'm constantly updating my knowledge of programming languages and staying current with new technologies and approaches to problem-solving.

EXPERIENCE

- **HCPRO CRM – SOFTWARE DE GESTÃO IMOBILIÁRIA**

2022 – Present

Develop new API's to export/import data
